

Course Registration / Information Form

Asbestos Analysis by TEM-Fundamentals

(Instruction in the Standard Methods for the Analysis of Asbestos by TEM)

The course covers sample preparation, analysis and reporting for the AHERA (Asbestos Hazard Emergency Response Act) method, the ASTM "Test Method for Airborne Asbestos Concentration in Ambient and Indoor Atmospheres... by TEM Direct Transfer" (ASTM Method D6281) and the ASTM Standard Dust Count Method (ASTM Method D5755). Information about the standard methods for the analysis of drinking water, the ASTM standard dust mass method (ASTM Method D5756), the NIOSH 7402 and AEM bulk and soil analysis will also be provided.

Class size is limited to six people to allow considerable hands-on microscopy experience with the methods. The course is taught by James R. Millette, Ph.D., Pronda Few and Al Harmon of MVA Scientific Consultants at our laboratory in Duluth, Georgia.

Date: Nov 15 - 17, 2011 First class begins at 9:00 am Tuesday

Tuition is \$1,500.00 and includes course manual, all classroom materials and lunches.

Questions? Contact Dr. Millette at 770-662-8509 or jmillette@mvinc.com
